

the LIGHT: COMFORT and SAFETY at the same time

2 MODULES AXOLUTE AIR
WITH REMOVABLE TORCH

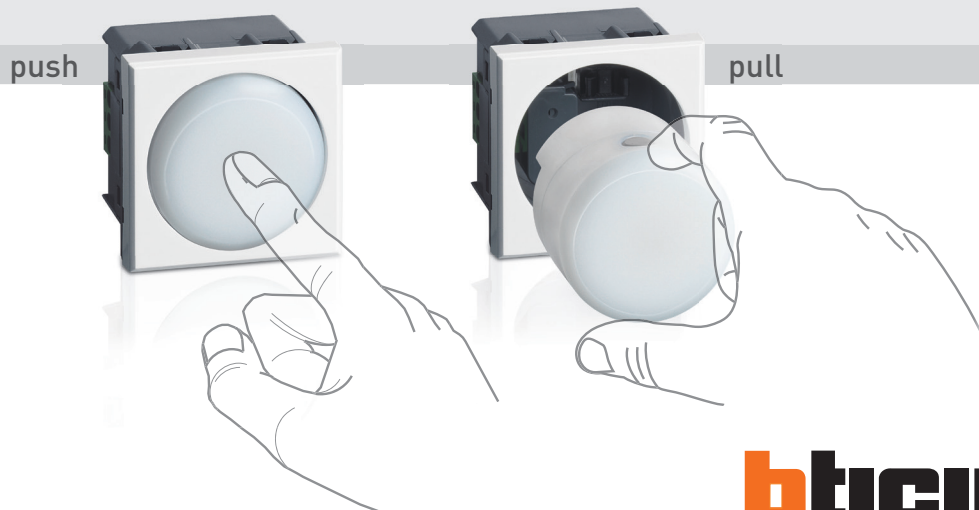

New removable TORCH

Modern, technological.

The new pull-out torch guarantees all the security you need when there is a black-out. The completely renewed design means it fits in perfectly with the BTicino domestic lines.

Fitted with a push&pull pull-out system, the new torch guarantees the planarity of the light point in which it is installed thanks to its thinness. The new ergonomics also allows easy pulling out from the flush-mounted base.
