

DOMINTELL DESIGN LINES

Domintell design for your interior

Domintell screens and push-buttons combine comfort and design.

All finishes available are synonymous with timeless design and are made from quality materials. In this catalogue, you will discover the Classic, Eco, Bticino^(*), Rainbow, Lithoss^(*), Niko^(*) and Qube ranges.

In some ranges, you can mix and match the colours of face plates and trims. In others, you can choose from millions of colours for the built-in LEDs. Guaranteed visual impact.

Truly multi-function push-buttons

Domintell push-buttons can fulfil many other functions besides switching on or off or dimming the lighting in a room. They also enable you to control the lighting in other rooms, the heating, ventilation, blinds, shutters, multi-room audio, garden sprinklers, pool lighting, etc..., and they give you an all-off function when you leave home.

The Domintell screens will allow you to control the entire living environment, including programming temperatures in different rooms, communicating with the outside world through the videophone function, managing ventilation, lighting moods, hi-fi, shutters and blinds, pool, garden, etc...

Classic Line

The CLASSIC range is available in three colours: white, metallic light grey and metallic dark grey. The LED backlight (blue) and LED indicator lights (red) are dimmable.

The CLASSIC line includes push-buttons with 1 - 2 - 4 - 6 contacts and push-buttons with configurable touchscreen, including the possibility of local temperature management and control of audio.

The range also includes a motion sensor and an infrared sensor. It can be installed in conventional type struts.

Rainbow Line

RAINBOW buttons are one of a kind. They are tactile push-buttons which emit an audible signal when pressed. The buttons are available in 2 and 4 contact versions, and in black and white.

They are equipped with RGB LEDs that enable you to choose colours for backlighting and indicator lamps from over 16 million colours, and that applies to each button. They are mounted in a strut that is a standard type but specially made for this button.

Eco Line

The ECO range of push-buttons is Domintell's budget range. The buttons provide the same functions and capabilities as the other Domintell ranges. The LED indicator lights (red) are dimmable. The push buttons are available in 1 - 2 - 4 contact versions. There is also a movement sensor and an infrared sensor.

In this range, we also offer accessories such as 230 V sockets (Belgian - French), TV or Ethernet sockets. The ECO line is only available in white.

It can be installed in conventional type struts.

Niko^(*) Line

Domintell modules have been developed for Niko's^(*) Intense and Pure ranges. They are currently available in light metallic grey and in white.

This Niko^(*) range includes push-buttons with 1 - 2 - 4 - 6 contacts, a motion sensor and an infrared sensor.

The LED backlights (blue) and LED indicator lights (red) are dimmable.

It can be installed in conventional type struts.

Axolute Line

Domintell modules are available for Axolute range by Bticino[®]), a brand of the Legrand group. Axolute push- buttons are available in light metallic grey and in white with 1 - 2 - 4 - 6 contacts. The backlight (blue) LEDs and LED indicator lights (red) are dimmable.

The range includes a push-button with a touchscreen that can be configured however you want. This button can also control the local temperature and audio.

Also available: a motion sensor and an infrared receiver module.

Qube Line

The Qube range is exclusively distributed by Domintell. It encloses the Domintell electronics with all the functions. The backlight LEDs as well for indicator lights are dimmable and can be set up and chosen individually among 8 different colors.

At first stage this range will be available in 3 and 6 buttons to be mounted in 3 module struts, type Bticino^(*). Afterwards 1 - 2 - 4 contact versions will be available to be mounted in conventional type struts. A large choice of frames type and color is available on order.

Bticino^() Line*

The Living / Light push-buttons by Bticino^(*) are available in light metallic grey and in white with 1 - 2 - 4 - 6 contacts. The backlight LEDs (blue) and the indicator LEDs (red) are not dimmable.

Also available: a motion sensor and an infrared receiver module.

Lithoss^(*) Line

Lithoss^(*) is a Belgian designer and manufacturer of design push-buttons and switches. Domintell has adapted its electronics for the standard Lithoss^(*) range with illuminated buttons.

This range offers a choice of eight colours for each button for the LED backlighting and for the LED indicator lights. The Lithoss^(*) range allows many variations in materials and colours. We recommend you consult the catalog Lithoss to make your choice.

And there are even more choices...

Interfaces with references DISM04-DISM08 allow you to use any other brand of push-buttons.

Due to the openness of the Domintell system, you can find the push-buttons that are best suited to the aesthetics and colours of your interior.

SCREENS AND VIDEOPHONE

Domintell screens and videophone enable you to display and control of all home automation functions. They are able to receive pictures from the door intercom and other IP cameras.

Domintell touchscreen controls are available in 3 colours: white, metallic light grey and metallic dark grey.
